

C.C. Steven & Associates Inc.

Static Mitigation
Manufacturing Solutions
Particle Capture System
Since 1978

Industrial Static Control Group

The world's leading manufacturer of industrial static control products since 1936.

Technology Static Control Group

Global leaders in advanced ionization for the ESD control in the semiconductor and medical device industries.

Particle Capture System

by C.C. Steven & Associates

Comprehensive particulate blow-off and capture systems, offered in standard options and custom configurations.

Industry-leading, expertly designed compressed air solutions for cooling, cleaning, and efficiency.

Endless options and innovative solutions for material handling and productivity, including racks, carts, totes, and more for applications from cleanrooms to warehouses.

Precision electrostatic detection and measurement solutions for semiconductor, aerospace, and test and measurement applications.

Innovative plasma and corona treating solutions to enhance surface adhesion for printing, coating, and laminating applications.

A broad range of essential static control products for the technology and manufacturing industries, including grounding products, cleanroom supplies, ESD apparel, matting, and testers.

High-quality, ergonomic ESD and cleanroom office chairs and work-stations, crafted since 1989.

ESD and cleanroom supplies, including PPE, disposable garments, gloves, tacky mats, shoe covers, and more.

ESD and contamination control films and sheets, including static dissipative adhesive-backed polyester and acrylic dissipative plastics.

ESD control products for electronics/cleanroom manufacturing, offering ESD shielding bags, wrist straps, mats, laminates, foot grounders, flooring, monitors, testers, and more.

Providing Manufacturing Solutions Since 1978. We are the **STATIC EXPERTS.**
